Title	Description
Arthritis and Podiatric Medicine - Walking Hand-in-Hand	A presentation designed for a general audience of patients or healthcare professionals. Included in the presentation are facts and definitions of arthritis, common causes, symptoms and treatments. Members are encouraged to add clinical slides from their own collections as appropriate.
Arthritis and Your Feet	A presentation featuring general information about arthritis and how it affects the feet.
Bunions and Hammertoes	A presentation designed for both patients and the public. It is fully customizable and can be used either as-is or with the addition of clinical slides.
Common Skin and Nail Conditions	A presentation designed for patients and the public. Includes information regarding conditions that podiatrists deal with daily, including ingrown nails, warts, corns and calluses, and heel fissures, among others.
Diabetes. It's a family affair. (from 2009 APMA Diabetes Campaign)	A presentation on diabetes and its complications, focusing primarily on the African-American community.
Diabetes: "Power to Control" Campaign Community Presentation	A presentation containing information about the NDEP "Power to Control" campaign. It can be used by area leaders to train and inform other members of their community about how they can use NDEP's free materials to promote the importance of comprehensive diabetes management.
Diabetes: The Numbers	An NDEP presentation containing the latest U.S. diabetes prevalence and incidence rates broken down by age, sex, and race/ethnicity. Designed as a resource for health care professionals, diabetes educators, and students.
Diabetes: The Science of Control	A presentation containing information about the science of diabetes control and highlighting NDEP's materials for consumers at risk for diabetes and health care professionals.
Diabetes: The Science of Prevention	A presentation containing information about the science of diabetes prevention that also highlights NDEP 's materials for consumers at risk for diabetes and health care professionals.
Diabetes and Your Feet	An overview of the latest statistics (as of 2006) on the disease, including information about the different types, who's at risk, and how it impacts the feet.
Diabetes is a Family Affair (from 2009 APMA Diabetes Campaign)	A presentation you can use to educate people on the local level about diabetes.
Diabetes is a Family Affair - Kid's Version	A presentation to help educate children about diabetes.
Diabetic Foot Exam Overview	A presentation derived from the "Knock Your Socks Off" Diabetic Foot Examination Pocket Guide.

## Available PowerPoint Presentations

Title	Description
Elect to Save Your Feet (from 2008 APMA Diabetes Campaign)	A presentation designed to educate the public about diabetes and the feet, and the importance of amputation prevention awareness.
Foot Care and Diabetes	A presentation on how diabetes affects the foot.
Heel Pain	A presentation designed for DPMs to use for community presentations or general patient education. The presentation is fully customizable and can be adapted to fit the audience.
How to Perform a Comprehensive Diabetic Foot Exam	A presentation featuring information on how to perform a visual foot inspection.
Kids' Feet: Podopediatrics	A presentation designed for both patients and the public. This presentation was developed by the APMA in collaboration with the American College of Foot and Ankle Pediatrics. This presentation was designed to be customized.
Knock Your Socks Off - Diabetic Foot Exam Overview	A presentation to educate health care professionals on how to perform a diabetic foot exam.
Peripheral Arterial Disease (PAD)	A presentation designed for both patients and the public. This presentation was designed to be customized.
Podiatric Medicine: Your Partner in Patient Care	A general information presentation geared toward primary care physicians, hospital staff personnel, or the general public. Members are encouraged to read over the presentation in advance, make changes as they see fit, and customize the presentation with their own personal and office information and credentials. Customizable sections are noted in red type.
Proper Foot Care for Expectant Mothers, Infants, and Children	A presentation that details the goals of the PKAW campaign, babies' foot facts, and more.
Running Shoes and Your Feet	A presentation designed for the public as a general overview on running shoes. It includes information on shoe shapes, heels, and soles and then includes some general running information. The presentation is customizable on the first and last pages and offers notes for speaking.
Sports Medicine and Your Feet (2 versions)	A presentation on sports medicine designed for a general audience. The program is provided in two different versions, one with sports medicine-related photos and the other on a sports-themed template. Both presentations are identical in content and are fully customizable.
What You Should Know About Heel Pain	A presentation covering the key aspects of heel pain education, including the most common causes of heel pain and their prospective treatments.
