## PICA 2020 COVID-19 Office Reopening Checklist

In response to the COVID-19 pandemic, many healthcare providers are now looking at moving from significantly reduced in-office encounters to gradually phasing into increased patient interactions. In the weeks and months to come, as the pandemic begins to recede, providers will likely have questions about how best to reopen. The unprecedented nature of the COVID-19 outbreak might make navigating this process confusing and stressful, so we have developed the following checklist to help guide you through these uncharted waters.

Yes	FU	NA	STATE AND LOCAL CONSIDERATIONS	Comments/Assignment
		$\square$	Use your states and local governmental offices for guidance.	
			Consider a phased opening (e.g., half of normal capacity	
			at first) based on patient demand, staffing, and supplies.	
			See Proposed State or Regional Gating Criteria	
		$\square$	CDC Recommendations for Evaluating and Testing Persons for	
			Coronavirus Disease.	
			CDC Clinical Questions about COVID-19: Questions and	
			Answers.	
Yes	FU	NA	OPERATIONS	Comments/Assignment
		$\square$	Check for updated information from the Centers for	
			Disease Control and Prevention (CDC), Occupational	
			Health and Safety Administration (OSHA), Enforcement	
			Guidance for Recording Cases of Coronavirus Disease	
			(USDL), Centers for Medicare & Medicaid Services (CMS),	
			and other authoritative and regulatory agencies on a daily	
			basis for updated recommendations.	
			Reinstate any professional liability, general liability, or other	
			relevant business insurance policies and programs that were	
			suspended during the closure.	
			Specifically, to your professional liability carrier, notify them	
			about changes to practice (e.g., resuming full-time service,	
			returning to original scope of practice, or permanently adding	
			telehealth services).	
			Contact OSHA authorities for mandatory reporting of employee exposure to COVID-19 that results in a positive test. See OSHA's	
			Enforcement Guidance for Recording Cases of Coronavirus	
			Disease 2019 (COVID-19).	
			Review changes to billing procedures and billing codes for health	
			insurance plans that the practice accepts.	
	$\square$		Confirm readiness of office support service providers (e.g.,	
			cleaning crew, laundry service).	
			With assistance of legal counsel, evaluate and update	
			all contracts for appropriate changes based on	
			lessons learned from pandemic-related issues.	
			Evaluate your practice's tax return preparation status.	

			Determine whether billing procedures for health insurance plans	
Vac	FU	NIA	you accept have changed during your closure.	
Yes	FU	NA	INFECTION CONTROL	Comments/Assignment
			Employers of healthcare workers are responsible for	
			following applicable OSHA requirements, including	
			OSHA's Bloodborne Pathogens (29 CFR 1910.1030),	
			Personal Protective Equipment (29 CFR 1910.132), and	
			Respiratory Protection (29 CFR 1910.134) standards. See	
			the Standards page for additional information on OSHA	
			requirements.	
			Check credible resources, such as the CDC and your state's	
			department of health, on a daily basis for new or revised	
			infection prevention and control recommendations.	
			Review CDC's guidance for Reopening Guidance for	
			Cleaning and Disinfecting Public Spaces, Workplaces,	
			Businesses, Schools, and Homes, or cleaning and	
			disinfecting your facility, and properly sanitize the office	
			before reopening.	
			Disinfectants for Use Against SARS-CoV-2	
			Review the cleaning vendor contract for expectations.	
			Identify the cleaning schedule moving forward.	
			Follow CDC's return-to-work guidelines for healthcare workers.	
			Verify that returning employees are in good health, that they	
			were not recently exposed to COVID-19, or that they have been	
			appropriately quarantined before returning.	
			For employees previously exposed to COVID-19, take their	
			temperature upon entry to the office each day. No-touch	
			thermometers are recommended. Have the employees wear	
			masks.	
			Maintain social distancing as necessary. Do not permit congregating in communal areas.	
			Re-educate staff on infection control protocols	
			and any other essential practice	
			policies/procedures, including:	
			The use of PPE (e.g., donning and doffing techniques).	
			Hand hygiene (e.g., washing and avoiding face touching).	
			Respiratory hygiene.	
			Ensure sufficient supplies of soap, alcohol-based rub, and paper	
			towels are available for reception, waiting areas, patient care	
			areas, and restrooms.	
			CDC-approved protocols for collecting, handling, and testing	
			<u>clinical specimens.</u>	
			Review settings on refrigerators used to store medications and	
			testing supplies. Confirm the temperatures have not registered	
Ma -	<b>5</b> 11	NLA	outside the normal recommended range for proper storage.	
Yes	FU	NA	COMMUNICATIONS	Comments/Assignment
			Update your patient portal, website, email, and other	
			communication modes to alert patients that the practice	
			has reopened. Have patients call for appointments to	
			inform initial staffing needs and hours. Depending on need,	

			consider shorter hours, longer appointment times, and	
			evening or weekend hours.	
			Verify with your answering service that all calls/messages have been communicated to the practice.	
		$\square$	Ensure outgoing messages reflect that the practice is	
			open again and include any changes to office hours.	
			Acknowledge patient deaths that occurred due to any cause	
			(including COVID-19). Update all patient health records as	
			needed.	
			Post signage in appropriate languages at the entrance of	
			the office to instruct patients with respiratory symptoms	
			and/or fever to notify staff immediately via telephone	
			before entering the office.	
			Follow up on labs, films, tests, and specialist referrals made	
			prior to the closure, results received while office operations	
			were suspended, or services provided via telehealth. Ensure	
			that patients completed, or are in the process of completing,	
			studies. Review lab reports that arrived via EHR or other	
			communication mode for critical or urgent follow-up issues.	
Yes	FU	NA	DOCUMENTATION	Comments/Assignment
			Thoroughly document your pandemic circumstances, decisions,	
			and any actions taken to ensure patient care and patient/staff	
			safety.	
			If you had limited or no access to your EHR system during your	
			office closure, add any notes to patients' records that were not	
			entered. You may be able to accomplish this by scanning your	
			handwritten notes or emailing those notes into your EHR system.	
			Reorient staff to your practice's documentation policies and	
			privacy/confidentiality protocols.	
Yes	FU	NA	SUPPLIES	Comments/Assignment
			Be suspicious of any offers of PPE, testing, and medication	
			discounts for bulk or group purchase due to fraudulent actors	
			trying to take advantage of the crisis and its aftermath.	
			Verify that you have sufficient supplies, either in the practice or

			considerations for telehealth.	
			Tailor your telehealth practice to evolving guidelines from the	
			Office of Inspector General and U.S. Department of Health and	
			Human Services.	
Yes	FU	NA	EMPLOYEES & HUMAN RESOURCES	Comments/Assignment
			Establish employee screening processes for COVID-19	
			(including guidance for self-monitoring for	
			symptoms), and follow CDC guidelines regarding	
			assessment of staff eligibility to return to work.	
			Ensure that the office has sufficient personal protective	
			equipment (PPE) to allow staff to perform their job functions in a	
			safe manner.	
			Keep in mind that otherwise healthy providers and	
			staff members may not yet be available to return to	
			work. Consider the stress (personal and	
			professional) they might be experiencing because of	
			the pandemic and trying to return to their normal	
			routines. Consider their childcare obligations,	
			including the reopening of daycare centers and	
			schools.	
			Assess whether the practice can afford to rehire all employees	
			and review available assistance (e.g., Small Business	
			Administration loans or state loans/grants).	
			Ensure that you have sufficient employees to properly staff the	
			office.	
			Verify that clinical employees still have active licenses,	
			registrations, and/or certificates.	
			Perform background and employment history checks for any new	
			employees hired as a result of staff turnover associated with the	
			closure.	
			Thank and praise your team often, and have frequent staff	
		1	meetings to check on your staff.
