Testimonial

“ I always wear sketchers shoes. They start to rub my toe after a few months. The diabetic shoes do not rub my foot and they are much more comfortable to wear all day at work.

“ I love my shoes, they make my feet feel so much better. My feet do not hurt after being on them all day long. My feet do not hurt at night and I can sleep so much better. Thank you so much for the shoes, I hope that we will be able to get more of them. It was a big help to be able to get these. Thank you again.

“It’s hard to find wide width shoes that don’t cost way over \$150 and harder here without driving to Miami. my current ones were on there last legs and hurting my feet, but it’s what I had. Tried several pairs locally but the support and fit were terrible. My librarian friend, knowing I am diabetic, forwarded me an email with your offer. I was skeptical as I figured it was only for low income people. I was pleasantly surprised to find out that I could get them. I received the shoes very quickly and once I got the insoles put together, I tried them on. They fit is perfect and feel awesome. I love the Velcro strap that makes putting them on so easy. I got a pair before that I hated. I actually had them 6 months before I discovered the Velcro and how they worked. They came apart easily so support was poor. Theses shoes are great and I can’t thank my friend enough for sharing the email. I don’t know many diabetics locally, so couldn’t share it myself. I am most appreciative to have gotten theses shoes. The socks were a nice addition that surprised me. I won’t wear them as much during the summer as heat oppressive here. I have similar ones that are short, so I’m sure that will be fine. The shoehorn is great too. Helps me get the shoes on easier. Thank you for providing them.
